
EXECUTIVE SUMMARY REPORT

OSD – Forest Edge Elementary School

May 22, 2020

What's New?

Forest Edge Elementary has continued to make big leaps of progress over the past couple weeks! Second floor resource areas are adding finishing touches to lockers and bathroom accessories. Corridors are receiving the final coating of paint, and soon writable wall paper will be installed for an additional, fun learning tool for future students.

1st floor classrooms and activity spaces continue to see great changes as well. Flooring is sweeping through the south classrooms, and cabinets and countertops are quickly being set. Ceiling tile is completely installed through the kitchen area, which has also had the quarry tile installed. Soon kitchen equipment will show up. The gym floor is making great progress with maple flooring, and the polishing of the concrete in the art room has begun. In the courtyards, the playground sets have been erected, as well as landscaping planted. The bus and drive lane curb and sidewalk has been poured, and site lighting has been installed. Exterior paneling is complete and solar array construction continues at a great pace!

The Past Weeks

- Flooring in 1st floor south classrooms
- Final paint in 2nd floor corridors
- Courtyard landscaping / kindergarten playground install
- Sitework including curb and gutter
- Network connectivity was completed with fiber installed

Coming Up in the Weeks Ahead

- Kitchen equipment installation
- Gym floor complete
- Storefront complete where left open for courtyard access
- Site grading and landscaping

Kindergarten Playground

Boys Gym Locker Room Area

Restroom Entrance tile

Did you know? All the solar panels installed on the roof of Forrest Edge Elementary will total 35,450 square-feet. That's about the same as eight full basketball courts!
